Introducing

ULTIMO

Luxury Vinyl Tiles (LVT) floors are a popular choice in homes because of the numerous benefits they offer. The durable vinyl planks and tiles consist of different layers, each one offering a specific characteristic. Developed and made in Belgium, Ultimo comes with the well-known benefits of LVT flooring: comfort, softness and warmth, while providing a seven-layer floor that gives the ultimate in performance.

Our design team went the extra distance to create a high-quality collection: a wide range of close to nature wood and stone effects in shades that bring an authentic look to every interior.

“

Made in Belgium, this high-performance floor is comfortable, durable, and a delight to the eye.

”

Why choose Ultimo?

BENEFITS OF ULTIMO

Soft, warm and quiet, Ultimo is a floor that makes everyone feel comfortable. What's more, its durable and long-lasting finish is beautifully simple to look after.

High-quality

Made in Belgium, Ultimo's performance multi-layer construction is strong, stable and resistant to temperature changes. This means a floor that's been tested to meet Class 23 and 33, proving its quality for every type of room.

Authentic beauty

With a design and finish that are close to nature, Ultimo stays faithful to the beauty of wood and stone. Its minimal pattern repeat means every room enjoys a natural look.

Easy-going comfort

Choosing Ultimo means choosing a floor that's quickly installed and easy to maintain. Its soft underfoot feel, warmth and noise absorption guarantee a comfortable space.

For a better planet

Because it lasts, Ultimo is a great sustainable choice. With recycled content and low impact manufacturing in Belgium, this is a floor that takes its responsibility to the planet seriously.

Ultimo, a performance multi-layered floor

HOW IS ULTIMO MADE?

Our R&D and production teams in Belgium are constantly innovating and always looking for ways to make better floors. Ultimo is a result of this collective effort: developed and manufactured in-house using the very best technology available to us today. Ultimo showcases the innovation of IVC Group with a compact multi-layer construction that delivers high performance. Scratch-resistant, stainproof and with excellent dimensional stability, this is a floor that's made to withstand life, day in and day out.

Let's look at Ultimo's multi-layer construction in a little more detail:

1 Protective Superguard® for superior resistance and easy maintenance

This is the icing on the cake performance-wise, giving Ultimo its superior scratch-resistance and an ability to fight off stains. Standing up to hard use, this protective layer makes Ultimo simple to clean and easy to keep looking after.

2 A reliable wear layer

The 0.55 mm thick wear layer makes sure that Ultimo's planks and tiles are tough enough for intense daily use and to meet the standards of class 23 and 33. The wear layer is made in-house for reliability and quality and that's why we back Ultimo with a long 20-year residential warranty.

3 A design layer that's close to nature

With Ultimo we aim to create beautiful and original natural designs printed with eco-friendly inks. The process is completely in-house, from inspiration to creation and production, so Ultimo comes with exclusive designs that you can't find anywhere else. By adding a bevel on the edges, it enjoys a more authentic natural look. What's more, we use a large pattern and cut out planks and tiles cleverly to avoid obvious repeats. This gives Ultimo a look that's closer to nature.

4 Double glass-fibre layer for the most stable floor

Ultimo's patented dual glass-fibre construction is the reason for its class-leading dimensional stability. It makes sure that Ultimo stays locked to the ground, regardless of temperature. Keeping movement to the bare minimum, the dual layers mean Ultimo can be used everywhere. So, whether a steamy bathroom, summery garden room or home office, Ultimo is ready for the challenge.

5 A durable compact core

While you may never see it, the compact core is crucial to Ultimo's durability. It provides the floor's indentation resistance to furniture and high heels. No matter how many people walk on it, Ultimo stays in great shape. Even better, we make this strong and durable compact core with up to 50% recycled content. Underlining just how important this layer is, Ultimo Click has a thicker compact core for a strong and secure click joint.

7 A sustainable backing layer with extra grip

Connecting Ultimo to the prepared subfloor beneath, the backing layer has an important part to play. We've added an embossed 'grip' texture to give the adhesive extra hold. There's also a direction arrow, so you know exactly which way to lay your plank and tile to create an authentic looking floor. This layer features up to 70% recycled content, another way we're reducing Ultimo's impact on the planet.

Looks

CLOSER TO NATURE

Designed in Belgium from exacting studies of original materials, Ultimo captures the nuance and variety of nature, presenting a sophisticated range of decors. A refined bevel and a detailed emboss make it even more realistic. A wide range of natural wood looks in natural colours and realistic stone looks ensure a sophisticated look that will fit in any interior.
